		Responses (%)					Course			
		A	B	C	D	E	N	Mean	Med.	Std Dev
Q6	Using A-E as grades, what is your overall rating of the course?	60%	40%	0	0	0	20	4.6	5	.49

Responses: [A] A=5 [B] B=4 [C] C=3 [D] D=2 [E] E=1

Q7 - What did you like about the course?

Response Rate: 55.00% (11 of 20)

- nice pace
- Well paced
- The teacher was absolutely awesome. Despite the obvious relation that she wasn't training to be a teacher, she was super helpful and gave it her all. She was always there whenever someone needed help, was super passionate about math, and just overall had a great attitude in class that she put into the classroom.
- The course spent an appropriate amount of time for the content.
- The application of calculus in several different ways which connects to all the different courses in engineering.
- Professor was very kind and helpful. She answered questions in a way to help people understand.
- Math is my favorite subject, so I may have been biased toward liking it, but my professor Erica Rutter is awesome! She genuinely cares that students understand the material and is always available outside class for additional help. She has set class periods for review before exams and the examples she gives are extremely relevant!
- Integrals
- I feel like everything was very planned out and easy to apply.
- Erica Rutter was the best professor by far I have had at my stay at ASU so far. Everything taught was clearly explained and when asked to help, she always was eager to explain anything. All around great teacher.
-

Q8 - What did you dislike about the course? Do you have any suggestions to improve the course?

Response Rate: 55.00% (11 of 20)

- nothing
- nope
- more worksheets just for practice

- The really heavy workload. Not necessarily the webwork, but the time out of class that needs to be spent to understand the material.
- The beginning of the course was crucial for learning other objectives later in the course. I feel like there should have been more emphasis on that.
- Series and Sequences
- N/A
- Less homework assignments. Personally i think the class was fantastic besides the amount of homework. Other students may be okay with the workload this class gives however with all of the other classes i had and working 25 hours a week in order to pay rent, i found it hard to complete a lot of the assignments.
- If you miss a day you pretty much will fail.
- It's not curved
- I don't enjoy how some of the webwork doesn't apply to the tests or work. I understand that webwork is made to help you "think outside the box," but there are some problems that don't show up on tests at all (or at least their method of solving the problem doesn't). My advice for improving the course would be to make webwork problems based on examples that would help students prepare for the test without them knowing it! I do remember that the webwork problems that did pertain to the tests did help me remember steps on how to solve specific problems.

Q10 - What did you like about the instructor or the method of instruction?

Faculty:	Rutter, Erica
Response Rate:	50.00% (10 of 20)
-	n/a
-	She was very kind and helpful during class.
-	She was always willing to help with questions and she went over most of the problems that we would face.
-	She knew when people were having trouble and to what extent to cover a topic. She didn't waste time when it came to instruction and focused heavily on the examples that we would see in the homework and exams.

-	She has great examples that are similar to what the exam will have. She does quizzes that test your knowledge while the course is still going, so it's like a checkpoint and sometimes they're group quizzes so you can learn from other people as well. They're mostly for attendance and they're easy points to get! She is very flexible about webwork and will make exceptions when students aren't yet familiar with certain parts. Great professor, awesome teacher.
-	Reviews in the beginning of classes helped with understanding material
-	Kind and would go in depth on the subject and help when asked.
-	Explained everything very in depth
-	Everything was well planned, very easy to understand when explained. Overall, a great instructor.
-	-

Q11 - What did you dislike about the instructor or method of instruction? Do you have any suggestions to improve instruction?	
Faculty:	Rutter, Erica
Response Rate:	50.00% (10 of 20)
-	nothing
-	nothing
-	n/a
-	To be honest I do not have any. She had a great balance of group work, lecture, and examples.
-	There isn't anything I dislike about this course or instructor! Although, the classroom was pretty far from every thing else, but that may be inevitable.
-	Nothing.
-	NONE
-	I did not like the random quizzes during some classes.
-	Chapter 8 was the most confusing spend more time on that. Reduce the amount of webworks because it took up a lot of time
-	-
